Project reference

Capital/403998/CWA/Pittenweem

Our alliance partner, Caledonia Water Alliance will be carrying out this work on our behalf.

28th April 2025

Taking care of your sewer network in your area.

What we are doing

We are taking care of the wastewater services in your community. As part of our planned improvement works in West Shore, we require to carry out some further site investigation work. This work involves taking some core samples from the sea wall at the existing chamber in West Shore and at various points along the route of the existing outfall pipe, taking some ground samples within the shore area and carrying out a slit trench trial excavation at the slipway at the end of Mid Shore. Please see over leaf for location details.

When are we doing it

Work is planned to start from Tuesday 6th May 2025 for approximately 5 days.

What happens next

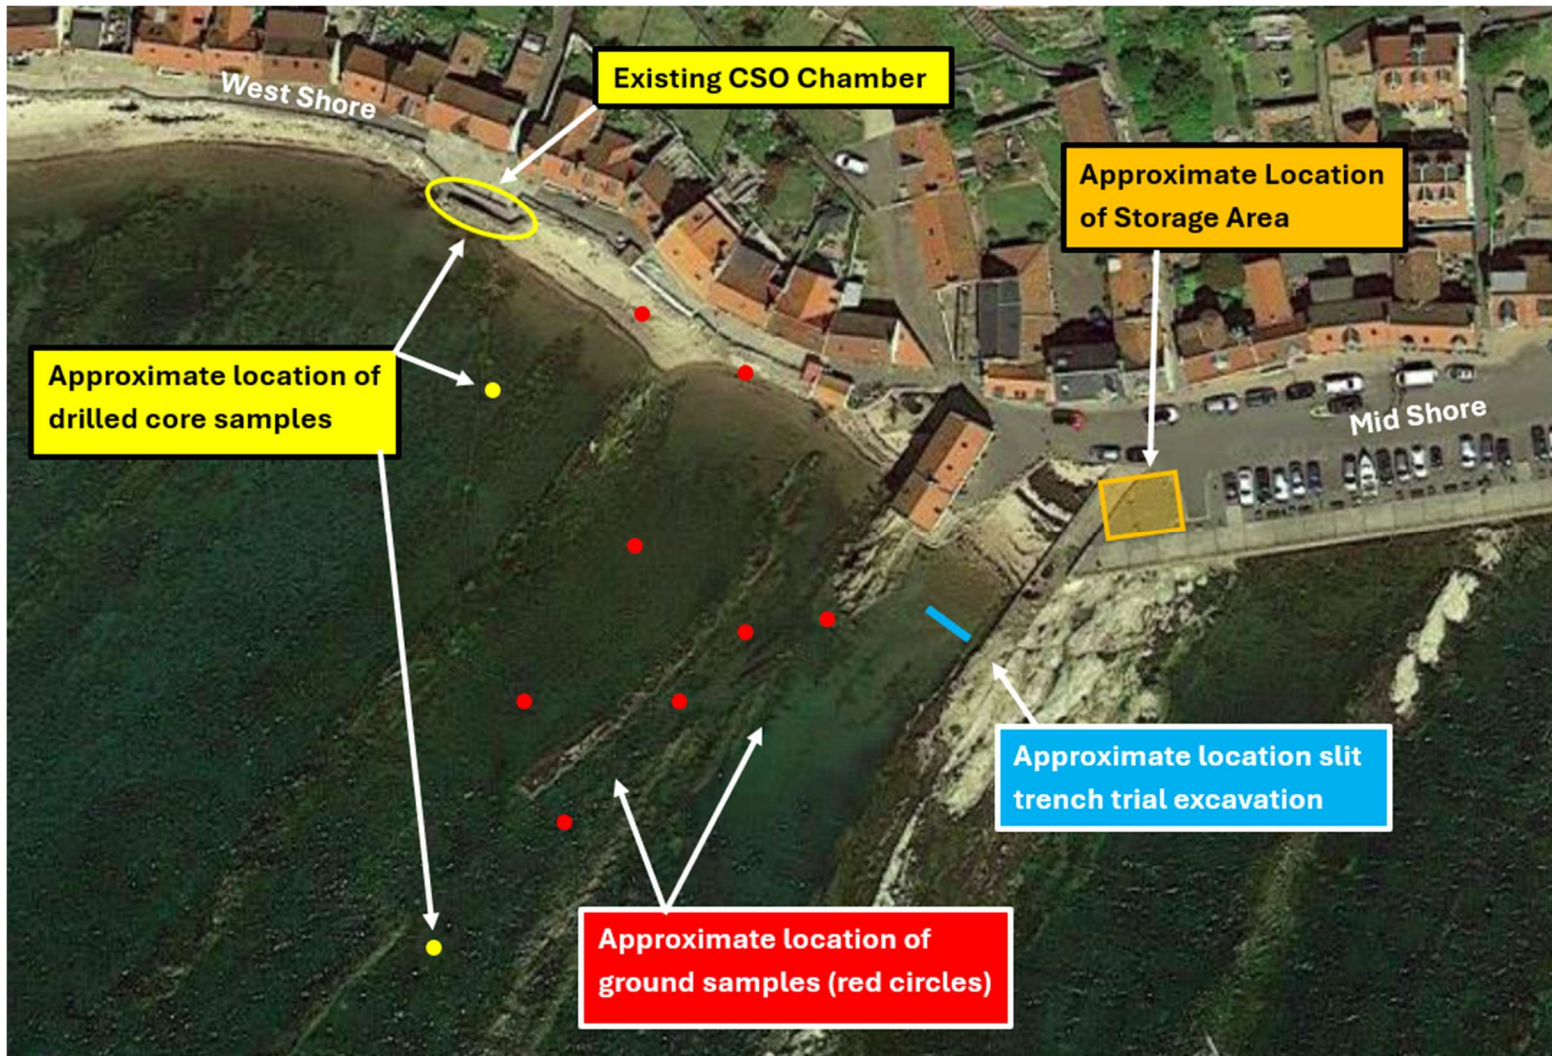

- These survey works will require some construction activities in and around the West Shore area including the beach. All activities will be overseen by a banksmen to ensure working areas are safe.
- Most of these investigation works are tidal and as such there may be times during the work where no activities are taking place.
- Local Access along West Shore will be maintained, and pedestrian access will be maintained at all times.
- We will require to occupy a small area next to the Mid Shore Car Park to store equipment during these works.
- Our contractors are carrying out this work on our behalf and will do all they can to keep disruption to a minimum.
